Abstract (en)
[origin: WO2006008711A2] A communication terminal (22) comprises an input port (24) for connecting to a portable device (18), an output connection (26) for connecting to a network (30), and a processor (28). The processor is arranged to automatically connect to a predetermined remote destination when a portable device (18) is received at the input port, and is also arranged to automatically upload information from, and download information to, the portable device.
