Abstract (en)
A drawstring 1 comprises a cord 3 having zip fastener type coupling elements 5 mounted along a first end portion 7 of the cord 3, towards one end 9 of the cord 3, and further coupling elements 5 mounted along a second end portion 11 of the cord 3, towards the other end 13 of the cord 3. A slider 17 is slidably mounted on the coupling elements 5 of the second end portion 11 of the cord 3. The ends 9, 13 of the cord 3 can be latched together to allow the slider 17 to slide along the coupling elements 5 of the first and second end portions 7, 11 to engage the coupling elements 5 as the slider 17 moves away from the first and second ends 9, 13 of the cord 3, thereby tightening the drawstring 1.
