Abstract (en)
The device illuminates passenger seat areas at a window and a duct (3A, 3B) in an interior of a vehicle, where the device is separated from an interior ceiling liner (2) of the interior of the vehicle and is arranged at an upper edge of a side window (7). The device is arranged between the side window and upper side window (8) adjacent to the side window. The device is arranged in a cross-over area between a vertical bar and a horizontal bar (9), which abuts at the side window and/or upper side window. An independent claim is also included for a panel device with a side window of a vehicle.
