Abstract (en)

[origin: EP1772419A2] The base plate (10) has a leading edge (16) by which the travelling sensor (18) in a mounting plate (20) signals the suitability for a maximum speed until it travels (22) to another edge (14) at which it signals a speed reduction. Further sensors positioned in further positions (26) react to further edges of the blanked aperture.
