Abstract (en)  
Device for opening a munitions storage container comprising a box (2) and a lid (3) comprises sensors (7, 8) for detecting a threat and a computer (6) that cooperates with the sensors to actuate an opening device that separates the box and lid if a threat is detected. Independent claims are also included for: (1) munitions storage container comprising a box and a lid and an opening device as above, where the lid has a groove facing the support surface of the box and the opening device comprises a strip of explosive (4) disposed in the groove and connected to a detonator (9) connected to the computer; (2) opening a munitions storage container using a device as above by detecting a threat, calculating the speed of the threat, and initiating opening of the container is the speed of the threat is greater than a reference value.
