Abstract (en)
[origin: WO2006008107A1] The invention relates to the use of selective insecticidal and/or acaricidal agents for controlling insects and/or arachnids. Said insecticidal and/or acaricidal agents are characterized by an active moiety of an active substance combination comprising (a) at least one substituted, cyclic dicarbonyl compound of formula (I), wherein W, X, Y, and Z have the meaning indicated in the description while CDC represents one of the dicarbonyl radicals mentioned in the description, and (b) at least one compound that improves crop plant tolerance and is part of the group of compounds indicated in the description. Also disclosed is a method for controlling insects and/or arachnids using the inventive agents.
