Abstract (en)

[origin: WO2006027433A1] A device for tamper protecting and authenticating a liquid product distributor comprises a container (R) provided with a cylindrical neck (C) with sealing means engaged therein and characterised in that it consists of an indicator element (T) provided with a collar (2) which elastically inwardly collapsible and whose largest diameter is greater than the neck internal diameter and which removably disposed on the lower part of said sealing means and is trapped in the container after a forced penetration through the neck. In a preferred embodiment, said indicator element (T) comprises a sleeve (1) in which the lower part of the sealing means is radially clamped.
