Abstract (en)

[origin: WO2006000683A1] The invention relates to a method for marking an ophthalmic lens according to predetermined patterns consisting in supplying a plate (1) provided with engravings (4), in filling said engravings (4) with marking ink, in applying a pad (7) to the engravings (4), in applying the pad (7) to the ophthalmic lens (5). The inventive method is characterised in that it also involves a stage for pre-preparing the pad (7) in such a way that at least two movable with respect to each other inking portions (12, 13) are defined and a transformation stage for modifying the arrangement of the inking portions (12, 13) which is carried out between the stage for applying the pad (7) to the plate (1) and the stage for applying the inked pad to the lens (5).
