Abstract (en)

[origin: WO2006013583A1] A radiator comprises at least one heating element (1) including at least one tubular element (2, 4, 6), at least one liquid feed/drainage pipe (14) and at least one cap (20). The connection portion (36) of cap (20) includes a coupling portion (36) and a reception portion (38). The coupling portion is adapted to be inserted in a reception portion (138) of a further connection portion (126) of the cap (20) and the reception portion (38) is adapted to receive a coupling portion (136) of said further connection portion (126) of cap (20) to produce mountable heating elements (1).
