Abstract (en)

[origin: WO2006012939A1] The invention relates to an arrangement for the transport of objects, in which said objects are transported in containers (10), provided with at least one electronic display means (20). The arrangement comprises generation means (30), for the generation of information for display on a display means (20), preparation means, for preparation of information for display in at least one device (50) and transmission means (40), for transmission of data from the device (50) to a display means (20) of a container. The electronic displays (20) are, for example, organic polymer displays or electronic inks of bistable elements. The applications of said displays for replacement of paper labels and displays with low material, cost and personnel requirements are numerous disclosed.
