Abstract (en)
The cleaner has a filter bag retainer (40) arranged at an inlet port (31). The filter bag retainer is held between a swivel-in position, in which the inlet port gripped through an opening of the retainer and a swivel-out position, in which the inlet port is relocated with respect to the opening of the retainer. The filter bag retainer is spring-elastically pre-tensioned in the swivel-out position and is detachably locked in the swivel-in position by a locking lug and a lock retainer.
