Abstract (en)
[origin: EP1775115A1] The device (1) has a corrugating roller unit (7) with corrugating rollers (6) that are adjacent to each other. A corrugating roller unit loader (27) is arranged with a set of corrugating roller unit holders (16). The loader is displaceable with respect to a housing (8) and guided between loader positions. A loader guiding portion (19) of one of the holders aligns with a housing guiding portion (20) to move a corrugating roller unit between a loader holding position and a housing operating position. The corrugating roller unit is accommodated in the corrugating roller unit holder.
