Abstract (en)

The luggage compartment cover (1) fits between two lateral supports (2) and comprises a supple panel (3) that retracts into a roll, and a rigid flap (4). It differs in that the flap has two corners (6) made to engage with shaped surfaces (7) on the lateral supports. Each of the lateral supports has a recess (9) and a rear-facing projection (10) that can engage with a notch (8) in the rigid flap when it is raised.
