Abstract (en)

The box unit has connections (111.1, 111.2) for water inflow lines and connections (111.3, 111.4) for water outflow lines. The connections are positioned in two sets of line channels that lead to a sanitary fitting (200). The connections and each part of one set of the line channels are arranged on separate angle brackets (110.1 - 110.4). The angle brackets are attached at the box in such a manner that the parts of the former set of the line channels are connected with parts of other set of the line channels in the box.
