Abstract (en)
[origin: EP1775415A2] The roller shutter casing (10) has a cover profile (12) formed with detent receiving recess (12.1) for receiving wall opening closure components (20). The detent receiving recess is formed between the detent lugs and detent receiving groove. The detent receiving groove is limited by the aligned detent lugs which are formed with identical structure. An independent claim is included for the roller shutter casing connection system.
