Abstract (en)

[origin: WO2006007748A1] The invention relates to a fastening element for an end area of a first strap of an item of corsetry, particularly of women's undergarments, which is to be fastened to a second strap of the item of corsetry and which has an number of strap plies of which at least one strap ply has a fastening part such as at least one hook, one eye or the like. The aim of the invention is to improve the comfort of wear. To this end, the invention provides that, for a fastening element of this type, a padding for improving the comfort of wear is provided between two strap plies. This padding is attached to at least one of the strap plies by joining it near the lateral edges of the fastening element. When the fastening element is in use, the fastening is located, at least in part, between strap plies of the fastening element.
