Abstract (en)  
[origin: WO2006013046A1] The invention relates to a system for exchanging sleeves (6, 6a), (6, 6a) that can be pushed onto the mandrels (5, 5a) of ink transfer rollers (4) of at least one printing press (1). Said system comprises a storage device, in which sleeves (6, 6a) (6, 6a) that are not required for the current print job can be stored and/or transport means (8, 9) for transporting several sleeves (6, 6a) (6, 6a) to the printing press (1). The invention is characterised by the means for transferring sleeves, said means transporting the sleeves (6, 6a) between the storage device and/or the transport means (8, 9) and the mandrels (5, 5a) of the ink transfer rollers (4) in the printing press or presses (1) and/or between the storage device and the transport means (8, 9).
