Abstract (en)

[origin: WO2006015711A1] The invention relates to a method for controlling a ceramic hob (30) comprising a plurality of cooking points (32). Precisely one operating element (15) is provided on a control device (11) for each cooking point (32). In a first operating level, said operating element is used to select the cooking point. The power adjustment functions, in addition to other functions, are controlled in a second operating level. A timer function can be regulated in a possible third operating level.
