Abstract (en)

[origin: WO2006015894A1] The invention relates to a method and a device for operating a sensor system, a processing unit being connected to at least one sensor of the sensor system via communication links. The invention is characterised in that the processing unit transmits data to at least one of the sensors, said data representing at least one recording and/or detection area of the sensor and/or control data for controlling the sensor mode.
