Abstract (en)

[origin: WO2005124701A1] The invention relates to a method for adjusting a banknote processing machine consisting in determining the threshold values of sensors for recognising the banknote state, in processing a plurality of banknotes by the banknote processing machine, in recording data of at least one sensor, in recognising the banknote state by means of recorded data and of at least one threshold value, in determining and displaying a correlation between the recognised banknote state and at least one threshold value, in modifying at least one threshold value on the basis of the displayed correlation, in redetermining at least one state and correlation and in redisplaying the correlation.
