Abstract (en)

[origin: WO2006021664A1] The inventive method for reading data received in the protected form (10) consists in transmitting at least certain protected data to a protection removing tool (3). The protected data is retrieved from a buffer memory (1) of a read stream of said data (100) and is transmitted to the protection removing tool by a security message router (2). In order to transmitting between said security message router (2) and the protection removing tool (3), data is recorded in assigned transfer frames.
