Abstract (en)

[origin: FR2891995A1] The knitted sock, comprising a main body (3) with a toe (1) and heel (2), has aeration zones (4, 5, 6, 7) below and above the toes, on top of the foot, and beneath the sole. The first three zones are transverse, narrow lens- or lozenge-shaped, and made from stitches of reduced density. The zone beneath the sole is made from a series of lengthwise strips (71), also with reduced density, alternating with normal strips (72) to form a rectangular shape. The aeration zone on top of the foot can also have stitches of reduced density alternating with stitches of normal density.
