Abstract (en)
A buckle assembly (40,70) includes a female connection member (70) having open button areas (76), and a male connection member (40) configured to mate with the female connection member (70). The male connection member (40) may include deflectable lateral arms (46) having buttons (48) that are configured to be positioned within the open button areas (76), and at least one flexible and resilient strut member (58) connecting the lateral arms (46) together.
