Abstract (en)
The piece of furniture (1) has a structure-forming framework (2.1,2.2,2.3) which is formed in such a way that at least two surface filling elements (11.1,11.2) can be fastened to it and which form a double-walled section of this region of the wall of the piece of furniture. The piece of furniture is formed in modular fashion. The framework is formed in such a way that the surface filling elements while maintaining a structure of the furniture can be selectively fastened and removed again, especially by hand. An independent claim is included for a surface filling element for a piece of furniture, with a base element (12.1,12,2) and a fastening element (15) as a separate component part which can be connected to the base element.
