Abstract (en)
[origin: EP1776902A1] The mattress includes a mattress core (1) which has an upper layer (2) adjoining a lower layer (3) in a boundary surface (5) which is adapted to the contour of a human body so that the upper layer has a height which varies over the length of the mattress. The height of the upper layer is constant over the width of the mattress core. The boundary surface extends in wavy lines over the length of the mattress core. The lower layer has a spring hardness which is greater than the spring hardness of the upper layer.
