Abstract (en)
[origin: EP1776990A2] Systems and methods for interactive play are provided, including a method of interacting with an action figure. The method includes the steps of providing a base (24) unit having a processor, providing an action figure (22) having a memory which stores data relating to the action figure (22), communicating the data in the form of communication signals to the processor, and presenting an activity instruction based on the communication signals received, with the activity instruction enacting a real-life activity that the action figure can engage in.
