Abstract (en)
[origin: WO2005110755A1] The invention relates to a method for feeding a plate to an impression cylinder of a printing press, to a method for producing said plate and to a device for laterally aligning and guiding a tympan sheet that is to be fed to a printing press cylinder. According to said method for feeding a plate to an impression cylinder of a printing press, the plate is fed to the impression cylinder in the axial direction of the latter in a precise manner using a device and during the feed process at least one edge of the plate that has been cut to run parallel to a delimitation line of the type area is guided against at least one stop of the device in an axial direction in relation to the impression cylinder.
