Abstract (en)
[origin: EP1777420A1] Diffuser (10) has diffusion barrier (20) and is limited by flow channel (26), which is constantly extending in flow direction (28) starting from a diffusion inlet (18) with a narrow cross section. The diffusion barrier extends along the flow direction whereby a non linear process runs in longitudinal section plane in sections. An independent claim is also included for the turbine.
