Abstract (en)
[origin: EP1623630A1] Powdery sweetener (I) for human consumption in the form of a homogenous mixture, comprises sweetening agent (A) (sodium saccharinate, calcium saccharinate, and/or saccharin) and potentiator (B) (comprising a mixture of neohesperidine dihydrochalcone (NHDC) and a vanilla flavor) (where the quantities of (A) and (B) confers a sweetening taste to (I)). Powdery sweetener (I) for human consumption in the form of a homogenous mixture, comprises sweetening agent (A) (sodium saccharinate, calcium saccharinate, and/or saccharin) and the potentiator (B) (comprising a mixture of neohesperidine dihydrochalcone (NHDC) and a vanilla flavor) (where the quantities of (A) and (B) confers a sweetening taste to (I)), in which the distribution of (A)/(B) is substantially homogeneous, not statistic, and the proportion of (A) compared to (B) is substantially constant and equal for one powder particle to another. Independent claims are also included for: (1) preparation of (I); and (2) sweetening food formulation in granules, comprising (I) dispersed on a dextrose, silica or starch type medium at a rate of 10-75 weight parts of (I) for 90 to 25 by parts weight of support.
