Abstract (en)  
[origin: WO2006022617A2] A protective garment including a generally continuous outer shell and a moisture barrier located generally inside of the outer shell such that when the garment is worn, the moisture barrier is located generally between the outer shell and a wearer of the garment. The moisture barrier includes at least one vent such that at least part of the air located inside the moisture barrier can be vented outside of the moisture barrier.
