Abstract (en)

[origin: WO2006021182A1] The invention relates to a gas reservoir bag (6) comprising a flexible bag (9) for separating two different gases by means of a connection. Said gas reservoir bag further comprises an outer bag (8) for generating a difference in pressure between the flexible bag (9) and the surroundings of the outer bag (8), said outer bag (8) enveloping the flexible bag (9) with the exception of the connection thereof. The invention also relates to a distributor housing for a breathing mask comprising such a gas reservoir bag as well as a breathing mask encompassing such a distributor housing. The invention finally relates to corresponding methods.
