Abstract (en)
[origin: WO2006019685A2] The present invention provides novel ginsenoside compounds, compositions (e.g. pharmaceutical compositions) comprising the ginsenoside compounds, and methods for the synthesis of these ginsenoside compounds. Additionally, the present invention provides methods for inhibiting beta-amyloid peptide production and methods for treating or preventing a pathological condition, particularly, neurodegeneration diseases (e.g. Alzheimer's disease), using these ginsenoside compounds.
