Abstract (en)

[origin: WO2006021500A1] A machine for the production of a web of paper or other fiber material (1, 6, 17, 37), comprising a belt (14, 26, 43), wherein the length of the belt (14, 26, 43) is elastically extendable, the web of fiber material (1, 6, 17, 37) can be fed to the belt (14, 26, 43) when the belt (14, 26, 43) is in extended state and the belt (14, 26, 43) can be slackened when the web of fiber material (1, 6, 17, 37) is placed thereon, such that the web of fiber material (1, 6, 17, 37) is compressed and the adhesion forces between the web of fiber material (1, 6, 17, 37) and the belt (14, 26, 43) are sufficiently high in order to avoid the formation of folds in the compressed web (1, 6, 17, 37).
