Abstract (en)
[origin: WO2006018274A1] Disclosed is a concealed plumbing fixture comprising a connecting member (1) that is provided with at least one connection (4) for a water pipe, especially a domestic cold water pipe and/or a domestic warm water pipe, and at least one fastening element (9) for fixing the connecting member (1) in a mounting hole. Said plumbing fixture further comprises a functional unit, particularly with a plumbing valve that is provided with connecting means for creating a water connection to complementary connecting means of the connecting member (1), and a joining device that allows the functional unit to be removably fixed to the connecting member (1). The connecting member (1) is preferably provided with an adjustable fastening device (10, 16, 17) by means of which the same can be fixed in the mounting hole at different mounting depths. The inventive plumbing fixture also comprises at least one fastening ring (10) that can be moved in an axial direction along the connecting member (1) as well as at least one means (17) for locking the fastening ring (10) on the connecting member (1).
