Abstract (en)
[origin: US8603413B2] A device for addressing an electrode array of $2n$ lines of an electro-fluidic device, each line having N electrodes ($n@N$). The device includes, on each line, n selection electrodes, all of the line selection electrodes being connected to $2n$ line selection conductors, $2n-1$ line selection electrodes of $2n-1$ lines being connected to each line selection conductor, and selection devices for selecting one or more line selection conductors.
