Abstract (en)

[origin: US2008128645A1] Disclosed is an actuating device (1) for fixtures, particularly plumbing fixtures, comprising at least one input unit that is provided with a plurality of sensors (2, 3, 4) which are connected to a control unit (10), and at least one drive unit (12) for at least one closing device (13) for at least one fluid pipe (14), especially a valve of a water pipe that can be controlled by means of the control unit (10). At least three sensors (2, 3, 4) are arranged in a substantially regular manner essentially along a closed curve (5). The drive unit (12) is triggered when signals of at least two adjacent sensors (2, 3, 4) are detected.
