Abstract (en)

[origin: EP2190230A2] Provided is a user privacy management apparatus and method on a Secure User Plane Location (SUPL) network including a SUPL Location Platform (SLP) and a SUPL Enabled Terminal (SET) and performing privacy authorization according to location of the SET, wherein when the location of the SET is calculated, the SLP (or SUPL Positioning Center (SPC) within the SLP) checks a privacy setup according to the calculated location, thereafter queries to a SET user whether to execute the privacy setup using a SUPL INIT message or a SUPL NOTIFICATION message, and then executes the privacy setup according to queries and responses transmitted through a SUPL START message or a SUPL NOTIFICATION RESPONSE message, whereby a user privacy can be managed more stably by notifying a user of the privacy setup according to the location of the user for reconfirmation.
