Abstract (en)

[origin: EP1780157A1] Method involves raising of leading first product part (14) for marking on inner side (48) of second product part (16) running in conveyance direction by a supporting organ (38) in such a way that the area (78) of inner side of second product part is laid open and first product part arrives over support surface for impression. Printed products are arranged on both sides on holding pads (26) of the conveyor (22) arranged transverse to conveyance direction. An INDEPENDENT CLAIM is also included for the device for marking folded printed products.
