Abstract (en)

[origin: EP1780343A2] The assembly has a supply device (2) for supplying cleaning agents and/or scents into a sanitary bowl (3). The supply device has a temporary storage (5) for temporarily retaining certain dose in the cleaning agents and/or scents. The storage is attached to a flushing pipe (6) that guides the flushing water to the bowl in a flow direction for a toilet tank (4), such that a part of the flushing water is temporarily flushed to the storage, during the flushing process. The temporary storage is connected with a supply tank (8), which is mounted in the toilet tank and sealed against water. An independent claim is also included for a flushing pipe for a sanitary flushing assembly.
