Abstract (en)

[origin: TW200538058A] According to this treatment method for a supple elastic textile piece (10) comprising at least one shaped portion (4) that must be partially treated surrounded by a plane portion, the supple elastic textile piece (10) is gripped at least two points (A, B) on the plane portion surrounding the shaped portion (4) to be treated, the gripped portion is stretched between these two points (A, B) so as to approximately flatten the shaped portion (4) gripped between the two points (A, B), and the stretched portion is treated while it is flat.
