Abstract (en)

[origin: US2005172400A1] An inflatable and/or portable crib includes a base platform sized and configured to support a child, and inflatable side panels extending vertically from and surrounding the base platform. The base platform and side panels define an enclosure for the child. An inflatable member is attached to the outer periphery of the base platform and protective webbing is attached to the inner panels of the crib in order to prevent harm to the child should a portion of the crib deflate.
