Abstract (en)
[origin: WO2006020322A2] This invention provides methods for determining the ability of a gene construct to alter the rhythm [.]and contractility of a syncytial cell. Furthermore, this invention provides methods for constructing a gene construct capable of altering the rhythm or contractility of a syncytial cell. Finally, this invention provides a method for constructing a gene construct capable of coupling to a syncytial cell.
