Abstract (en)

[origin: WO2006016223A1] A method for simultaneously forming and decorating ceramic articles, comprising the steps of: a) preparing a press (1) provided with a first punch (2) and a second punch (3) mutually movable between a spaced-apart position and a close-together position in which a moulding cavity (4) is defined; b) drawing over the first punch (2) a frame (5) provided with an elastically deformable membrane (6), said membrane (6) being partly covered with decorative material on that side facing the second punch (3); c) driving the press (1) into said close-together position; d) loading ceramic material into said cavity (4) and subjecting it to compression to form the article; e) returning said press (1) to its spaced-apart position and withdrawing the decorated ceramic article.
