Abstract (en)
[origin: WO2006018474A1] The invention relates to a sack which comprises a bag part (1) with a bottom, a mouth and sides and which can be filled through the bottom or the mouth with material, such as fertilizer, and a handle part (3) on the side of the bag part having a support part (4) strengthening the edge. The handle part (3) comprises an elongate hollow tunnel, in which a carrying bar (4) has been attached, and that the handle part has one or more carrying openings (5), by which the sack can be carried.
