Abstract (en)
[origin: WO2005121014A2] The invention relates to a safety device in an elevator door opening, said safety device comprising at least a toe guard (3) placed substantially at the lower edge of the elevator car and having an upper part (6) and a lower part (9) moving or movable relative to the upper part. The lower part (9) has been fitted to slide upwards in a telescoping manner inside the upper part (6) when it meets an obstacle.
