Abstract (en)

[origin: WO2006018135A1] The invention relates to the use of copolymers, obtained by polymerisation of a) at least one compound of formula (I) (monomer A) where R1 and R2 independently = H, or CH₃, R3 = C₆-C₁₀ aryl or C₇-C₁₂ aralkyl, with possibly one or more same or different C₁-C₉ alkyl and/or C₁-C₅ alkoxy substituents and n = a whole number from 0 to 100, b) at least one compound selected from the group of N-vinylamides, N-vinylactams, N-vinylimines and N-vinylamines with 2 to 15 carbon atoms (monomer B), c) optionally one or more different difunctional curing components d) optionally, one or more different regulators and e) optionally, one or more further copolymerising components (monomer C), as solubilising agents.
