Abstract (en)

[origin: WO2006021284A1] Disclosed are methods for producing a coated shaped detergent or cleaning agent body. Said method comprises the steps of a) providing a shaped body that encompasses a cavity in the form of a depression or a continuous hole, and b) applying a coating agent to the surface of the shaped body such that the coated surface of the shaped body is covered with 0.2 to 50 mg/cm² of the coating agent. The inventive methods are suitable for producing shaped detergent or cleaning agent bodies that are very hard and dissolve easily.
