Abstract (en)

[origin: WO2006021311A1] The aim of the invention is to facilitate and simplify the installation of spindle supports (8, 12, 13) on the spindle supporting bridges (5) of a ring spinning frame. For this purpose, the spindle supporting bridges have bifurcated ends and the seats (14) for the spindle supports arranged on the bifurcated ends (17) engage with the spindle supports in windows which remain free for all spindle gauges (11', 11'') provided for a ring spinning frame.
