Abstract (en)

[origin: WO2006021261A1] The invention relates to a device for the optical control of products (64) in the tobacco processing industry, comprising an image recording unit (41 - 43, 60, 63, 65). The inventive device is characterised in that the image recording unit (41 - 43, 60, 63, 65) comprises at least one gradient index lens (60). The invention is also characterised by the use of a gradient index lens (60) for the optical control of products (64) in the tobacco processing industry.
