Abstract (en)
[origin: WO2006022681A1] A system, method, and data structure for testing packages are described. Tests may be combined into testing packages at testing packages user interface (301) to make testing of computer systems easier for developers. Testing packages may be sets of one or more testing procedures that may be applied to computer systems from a testing packages user interface (301). Testing packages may inherit information based on their relationship to other testing packages.
